

A heatmap visualization of a distance matrix, likely representing pairwise distances between samples. The matrix is square and filled with a red color, indicating the distance values. A prominent diagonal line of darker red runs from the bottom-left to the top-right, representing the self-distances (zero). Hierarchical clustering dendrograms are visible along the top and left edges of the matrix, showing the hierarchical relationship between the samples. A blue vertical line highlights a specific column, and a blue horizontal line highlights a specific row, intersecting at a point in the matrix.

[illegible]
